- Global Leader in Manufacturing of Alternative Fuel Systems with over 40% Market Share in Gaseous Fuel Systems
- Pioneer in Research and Development—5% of Annual Revenues Reinvested in R&D
- Fuel System Manufacturing and Distribution
- World's Highest Volume OEM Supplier

Established in the United States in early 2010, Landi Renzo USA leverages our parent company for global experience in alternative fuel systems design, engineering, manufacturing, installation, sales, marketing and service in cooperation with OEM's and aftermarket sales. Landi Renzo USA operates an installation facility in California that offers turn-key alternative fuel system installations of Landi Renzo and Baytech systems. Additionally, Landi Renzo USA offers OEM-like Ship Thru capabilities for our Ford CNG products through select Ford authorized QVM facilities.

Baytech Corporation, acquired by Landi Renzo USA in 2010, has over 20 years of dedicated U.S. based engineering and sales of high quality medium and light duty CNG and LPG fuel systems. Founded in 1991, Baytech is the leader in engineering high performance EPA and CARB certified CNG fuel injection systems for Chevrolet, GMC, Isuzu, Freightliner Custom Chassis and Workhorse Custom Chassis vehicles.

From our headquarters in California to our network of partners around the country, Landi Renzo USA and Baytech offer some of the world's finest alternative fuel solutions. Our technology helps you lower vehicle emissions and reduce your environmental impact, all while decreasing fuel costs and maintaining vehicle performance.
